

Golden Zone Property

- 59 km² property, 100% owned; mining Lease (32 year term remaining) plus State of Alaska land
- Intrusion-related Gold System – analogies: Donlin Creek (+39 Moz), Fort Knox (+8 Moz) & Dublin Gulch (+6 Moz)
- District scale: + 6 km long mineralized corridors
- A multi-element gold-rich breccia pipe deposit: 2016 NI 43-101 **Indicated Res. of 267,400 oz Au** plus an Inferred Res. of 35,900 oz Au - open at depth with several untested nearby occurrences (i.e **1.5 m @ 15.43 g/t Au, 250 g/t Ag, 2.65% Pb, 4.65% Zn, 0.25% Cu**)
- Several new different untested high grade Au occurrences (> **5 g/t Au to + 25 g/t Au with Ag ± Cu**)
- High-grade Au-Cu vein mineralization (i.e. **13.72 m @ 7.01 g/t Au, 94.1 g/t Ag & 4.0% Cu**) in three large occurrences over a 2 km area

Amanita Property

- 15 km² property, 100% owned, contiguous to Fort Knox mining operation, currently mining < 0.6 g/t Au
- Intrusion-related Gold System - structurally controlled mineralization with geological, structural and alteration similarities to the Fort Knox mine (+8 Moz)
- The main mineralized zone (Tonsina Trend) sits within a 2 km x 3 km gold in-soil anomaly directly on trend, 5.6 km south of the Fort Knox open-pit mine
- Highlight drill results (< 100 m from surface), along 1.6 km Tonsina Trend: **4.57 m @ 11.49 g/t Au; 22.86 m @ 1.01 g/t Au; 12.19 m @ 2.28 g/t Au and 13.72 m @ 3.02 g/t Au**

Jungo Property

- Structurally controlled Au-Cu mineralization; 20 km², 100% owned, located between Hycroft (~ 25 Moz Au) and Sleeper (~ 7 M oz Au) deposits
- 5 km long Au-Cu system; mineralization in a magmatic-hydrothermal environment controlled by NNE structures
- Geophysics suggesting the presence of sulphides in association with intrusions, and the IP data suggests multiple phases of mineralization
- Significant drill intercepts (< 200 m from surface)
 - **4.27 m @ 1.67 g/t Au, 57.7 g/t Ag and 2.72% Cu**
 - **1.52 m @ 2.50 g/t Au, 71.6 g/t Ag and 0.67% Cu**
 - **12.19 m @ 1.29 g/t Au, 28.6 g/t Au and 0.72% Cu**
- Most of the historical drilling stopped short of testing their targets and may have been drilled down dip to the mineralized targets
- < 1.5 km of the trend has been partially evaluated with many geophysical and geologic targets untested

Dome Hill Property

- Within Walker Lane mineralized trend; + 6 km of known high sulphidation vein systems, all open and not fully evaluated; 100% owned
- Numerous high-grade grab samples: **45.7 g/t Au, 31.8 g/t Au, 27.5 g/t Au**
- Selected shallow drill hole results include:
 - **4.6 m @ 4.7 g/t Au**
 - **1.5 m @ 9.7 g/t Au**

Exploration → Discovery → Value

- Assemble a portfolio of gold properties of “world class stature” to facilitate the need of ‘filling in the gap’ in the discovery pipeline for new deposits.
- Remain within “known mine friendly jurisdictions” of North America.
- Be prudent and disciplined in advancing our high quality mineral portfolio up the value chain, thereby creating the ultimate return on investment for all of our shareholders.

Board of Directors

- **David C. Anderson**, B.Sc., APGO
Co-founder of QGX Ltd. & Antares Minerals
- **Giulio T. Bonifacio**, CPA, CGA, Director
President & CEO of Nevada Copper Corp
- **Victor H. Bradley**, CPA, CA, Director & Interim CFO
Director of Osisko Gold Royalties & Nevada Copper
- **Dino Titaro**, M.Sc., P.Geo, President & Director
Director of Yamana & founder of Carpathian Gold
- **James Polson**, MBA, Director
CEO of a Hong Kong based Construction and Mining Services company

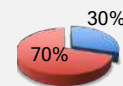

Advisory Board

- **Douglas Kirwin**, B.Sc., M.Sc., FSEG
Co-recipient of the Thayer Lindsley medal awarded for the most significant international mineral discovery in 2004. Involved in several major gold discoveries, including the Hugo Dummett deposit at Oyu Tolgoi in Mongolia
- **Alexander Davidson**, M.Sc.
In 2003, named the Prospector of the Year by the PDAC in recognition for his team's discovery of the Lagunas Norte Project in the Alto Chicama District, Peru

Management

- **Dino Titaro**, M.Sc., P.Geo, President & Director
+35 yrs international experience. Co-discover of 2 major deposits, a gold-copper and gold-silver deposit (currently in production) totaling 8.4 million oz of Au and 1.4 billion pounds of Cu
- **Ken Brook**, B.Sc, M.Sc, President Avidian Gold US Inc.
Certified Professional Geologist and a Qualified Person with 43 years of mineral exploration experience with the majority of his work in the western US with a focus on volcanic- and sediment-hosted gold deposits in Nevada
- **Dr. Tom Setterfield**, PhD, P.Geo, VP, Exploration
+35 yrs international experience, involved in the Golden Hills gold-rich VMS deposit, Mongolia
