1. DESCRIPTION OF BUSINESS AND GOING CONCERN

Avidian Gold Corp. ("Avidian" or the "Company") was incorporated pursuant to the provisions of the British Columbia Business Corporations Act on September 24, 2013. The Company was continued into the Province of Ontario on October 20, 2020. The registered head office of the Company is located at 18 King Street East, Suite #902, Toronto, Ontario, M5C 1C4.

Avidian is in the business of acquiring and exploring gold projects. As of March 31, 2022, the Company has acquired the rights to explore four gold properties in the United States of America and has a 32% ownership of High Tide Resources Corp. which holds the right to explore two properties in Eastern Canada.

The condensed interim consolidated financial statements of the Company for the three and nine months ended March 31, 2022 were reviewed, approved and authorized for issue by the Board of Directors on May 27, 2022. Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of operations of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements or regulations, unregistered prior agreements, unregistered claims, aboriginal claims, and non-compliance with regulatory and environmental requirements. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, and currency exchange fluctuations and restrictions.

The Company's property interests are at an early stage of exploration and, in common with many exploration companies, the Company raises financing for its exploration and evaluation activities in discrete tranches. The Company has incurred earnings for the nine month period ended March 31, 2022 attributable to shareholders of the Company of $147,646 and has an accumulated deficit of $18,138,861. Management believes it has sufficient working capital to cover ongoing corporate costs for the next 12 months, however, dependent on exploration results, the Company may need to raise additional funds. Although the Company has been successful in raising funds to date, there can be no assurance that adequate or sufficient funding will be available in the future, or available under terms acceptable to the Company. In the event that the Company is unable to secure further financing it may not be able to complete the development of its gold, copper and other mineral projects.

These condensed interim consolidated financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The Company's ability to continue as a going concern is dependent on its ability to obtain additional sources of financing to successfully explore, evaluate and develop gold projects and ultimately, to achieve profitable operations. The success of these endeavours cannot be predicted at this time. The condensed interim consolidated financial statements do not reflect adjustments to the carrying values and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern, and such adjustments may be material.

2. BASIS OF PRESENTATON

Statement of compliance

The condensed interim consolidated financial statements of the Company have been prepared in accordance with the International Accounting Standards ("IAS") 34, Interim Financial Reporting issued by the International Accounting Standard Board ("IASB"). These condensed interim consolidated financial statements have been prepared in accordance with the accounting policies described in Note 2 of the Company's annual consolidated financial statements as at and for the years ended June 30, 2021 and 2020 ("Annual Financial Statements"). Accordingly, these condensed interim consolidated financial statements as at and for the three and nine months ended March 31, 2022 and 2020 should be read together with the Annual Financial Statements.

Basis of consolidation

The condensed interim consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries Avidian Gold Inc., Avidian Gold US Inc., Avidian Gold Alaska Inc., and High Tide Resources Inc. These financial statements include all assets, liabilities, revenues, expenses, and cash flows of the Company and its subsidiaries after eliminating inter-entity balances and transactions.

On closing of the High Tide Resources Corp. ("HTR Corp.") transaction (Note 9), the Company's equity interest decreased from 52% as at December 31, 2021 to 32% on February 24, 2022. As such, the Company ceased consolidation of HTR Corp. and commenced accounting for the results of HTR Corp. using the equity method.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies adopted are consistent with those of Note 2 of the Company's Annual Financial Statements.

4. CAPITAL MANAGEMENT

When managing capital, the Company's objective is to ensure the entity continues as a going concern as well as to achieve optimal returns for shareholders and other stakeholders.

Management adjusts the capital structure as necessary in order to support the acquisition, exploration and development of gold resource assets.

The Board of Directors does not establish quantitative return on capital criteria for Management, but rather relies on the expertise of the Company's Management to sustain the future development of the business. The Company considers its capital to be equity, which comprises share capital, share-based payment reserve and deficit, which at March 31, 2022, totaled $2,505,878 (June 30, 2021 - $1,698,064).

The Company invests all capital not required for its immediate needs in short-term, liquid and highly-rated financial instruments, such as cash and other short-term guaranteed deposits, all held with select major Canadian financial institutions.

4. CAPITAL MANAGEMENT (continued)

The Company is currently attempting to identify an economic gold resource and as such, the Company is dependent on external financing to fund its activities. In order to carry out planned acquisitions and exploration, as well as pay for administrative costs, the Company will spend its existing working capital and raise additional amounts, as needed.

Management has chosen to mitigate the risk and uncertainty associated with raising additional capital in current economic conditions by:

a. maintaining a liquidity cushion in order to address any potential disruptions or industry downturns;
b. minimizing discretionary disbursements; and
c. exploring alternative sources of liquidity.

In light of the above, the Company will continue to assess new properties if the Company believes there is sufficient potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is appropriate. There were no significant changes in the Company's approach to capital management during the nine months ended March 31, 2022.

5. FINANCIAL RISK FACTORS

The Company’s activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk (specifically commodity price risk).

Risk management is carried out by the Company's Management with guidance from the Audit Committee under policies approved by the Board of Directors. The Board of Directors also provides regular guidance for overall risk management.

Credit risk

Credit risk is the risk of loss associated with a counterparty’s inability to fulfill its payment obligations. The Company's credit risk is attributable to cash. Cash is held with a reputable financial institution, from which Management believes the risk of loss to be remote.

Included in amounts receivable is sales tax receivable from government authorities in Canada. Amounts receivable are in good standing as of March 31, 2022. Management believes that the credit risk concentration with respect to financial instruments included in amounts receivable is minimal.

Liquidity risk

Liquidity risk is the risk that the Company will not have sufficient cash resources to meet its financial obligations as they become due. The Company's liquidity and operating results may be adversely affected if the Company's access to the capital market is hindered, whether as a result of a downturn in stock market conditions generally or related to matters specific to the Company.

5. FINANCIAL RISK FACTORS (continued)

The Company generates cash flow primarily from its financing activities. As at March 31, 2022, the Company had cash of $610,120 (June 30, 2021 - $5,218,564) to settle current liabilities, excluding subscription receipts payable, of $217,382 (June 30, 2021 - $357,520). The Company regularly evaluates its cash position to ensure preservation and security of capital as well as maintenance and liquidity.

All of the Company's current financial liabilities as at March 31, 2022 have contractual maturities of less than 30 days and are subject to normal trade terms.

Market risk

<u>Interest rate risk</u>

The Company has cash and cash equivalent balances subject to fluctuations in the prime rate. The Company's current policy is to invest excess cash in money market funds traded by its banking institutions.

The Company periodically monitors the investments it makes and is satisfied with the credit ratings of its banks. Management believes that interest rate risk is remote as investments are short-term, and the Company currently does not carry interest-bearing debt at floating rates.

<u>Foreign currency risk</u>

The Company primarily incurs expenditures in US dollars and Canadian dollars. As at March 31, 2022, the Company holds in cash the following amounts (reported in US$ currency) in Canadian ("CDN") and US funds respectively: $431,469 and $178,651 (June 30, 2021 - $4,851,509 and $367,055).

<u>Commodity price risk</u>

The Company is exposed to price risk with respect to gold prices. Commodity price risk is defined as the potential adverse impact on earnings and economic value due to gold price movements and volatilities. The Company closely monitors gold prices to determine the appropriate course of action to be taken by the Company.

Sensitivity analysis

As of March 31, 2022 and June 30, 2021, both the carrying and fair value amounts of the Company's current financial instruments are approximately equivalent due to their short-term nature.

The sensitivity analysis shown in the notes below may differ materially from actual results. Based on Management's knowledge and experience of the financial markets, the Company believes the following movements are reasonably possible for the period ended March 31, 2022:

(i) As at March 31, 2022, if foreign exchange rates had decreased/increased by 1% with all other variables held constant, the loss for the period ended March 31, 2022 would have changed by $2,723 as a result of lower/higher foreign exchange gains and losses on funds held in foreign currencies and reported shareholders' equity would also not have changed by a material amount.

(Expressed in US dollars – except where otherwise indicated)

5. FINANCIAL RISK FACTORS (continued)

(i) Commodity price risk could adversely affect the Company. In particular, the Company's future profitability and viability of development depends upon the world market price of gold. Gold prices have fluctuated significantly in recent years. There is no assurance that, even as commercial quantities of gold may be produced in the future, a profitable market will exist for them. As of March 31, 2022, the Company was not a gold producer. As a result, gold price risk may affect the completion of future equity transactions such as equity offerings and the exercise of stock options and warrants. This may also affect the Company's liquidity and its ability to meet its ongoing obligations.

Fair value hierarchy and liquidity risk disclosure

The three levels of the fair value hierarchy are as follows:

Level 1	Unadjusted quoted prices in active markets for identical assets or liabilities;
Level 2	Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
Level 3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At March 31, 2022 and June 30, 2021, the Company did not hold any financial assets in the fair value hierarchy.

At March 31, 2022 and June 30, 2021, the fair value of the Company's warrant liability is based on Level 3 measurements. There were no transfers in or out of Level 3 during the period ended March 31, 2022 or the year ended June 30, 2021.

Level 3 Hierarchy

The key assumptions used in the valuation of the warrant liability include (but are not limited to) the value at which a recent financing was done by the Company and share price volatility of comparable publicly-traded companies.

For the warrant liability valued based on market-based valuation technique, the inputs can be judgmental (See Note 9). A +/- 25% change in the fair value of this Level 3 liability as at March 31, 2022 would result in a corresponding +/- $11,129.
