

Avidian Gold

Value Creation Through
Exploration & Discovery

Exploring Advanced Stage Gold Projects in Alaska & Nevada

COMPANY OVERVIEW

A publicly listed Canadian company (TSX.V: AVG), Avidian is a gold explorer with advanced stage projects in mineral rich Alaska & Nevada

Dedicated Team

Track record of value creation through discovery and sale of projects.

Focused Strategy

Operating in mining friendly and gold-rich jurisdictions.

Right Place

Alaska -Tintina Gold Belt & Nevada - Humboldt County

Attractive Exploration

Jungo located in highly mineralized district of NW Nevada
Amanita located beside Kinross Gold's Fort Knox Mine in Alaska

KEY ATTRIBUTES – GOLDEN ZONE, AMANITA & AMANITA NE, ALASKA

- Avidian has assets i) Golden Zone, ii) Amanita & iii) Amanita NE
- All located within the prolific Tintina Gold Belt, a gold belt that hosts over 130 Moz
- Open Pit resource at Golden Zone with high grade core
- Amanita could provide feed to Kinross Gold's Fort Knox Mine with its high-grade potential (27.2 m @ 3.1 g/t & 27.0 m @ 4.22 g/t Au)
- Great access to infrastructure with assets located close to paved state highways, railways, and power grid

Golden Zone: hosts Breccia Pipe Deposit, plus district scale hosting multiple targets with multi-million ounce potential, +12 Km mineralized trend

Amanita: only 5 km SW of Fort Knox which has produced +8 Moz Au

Amanita NE: adjacent to Kinross Gold's producing Gil Mine

KEY ATTRIBUTES - JUNGLO PROPERTY, NEVADA

- Situated on a +2 km long gold & copper mineralized trend
- Very near to Hycroft Mine (15 Moz, Eric Sprott & AMC recently invested \$56 M) and Sleeper Mine (3 Moz)
- Geology is associated with very large gold-copper (Au-Cu) systems
- Ready to drill 6-8 holes to test vein system and intrusive target-fully permitted and bonded

OPPORTUNITY

- Trading at very low valuation relative to peers
- Value underpinned by Ind. & Inf. resource of 300 K oz Au & 1.5 M oz Ag
- Assets in two highly prolific and mining friendly regions of USA
- Portfolio of advanced stage, drill ready projects
- Avidian owns a 28% interest in High Tide Resources valued at +\$2.0 million

EXPERIENCED TEAM

Dino Titaro	Chairman & Director
Steve Roebuck	Dir., Pres. & CEO
Donna McLean	CFO
John Schaff	VP Exploration
Stephen Altmann	Independent Director
James Polson	Independent Director
Rick Winters	Independent Director
Alexander Davidson	Technical Advisor
Douglas Kirwin	Technical Advisor
Dr. Tom Setterfield	Technical Advisor
David Anderson	Technical Advisor

KEY FINANCIALS - \$CAD

Share Price	\$0.015
Shares Outstanding	185.4 M
Market Capitalization	\$2.8 M
Share Price Year High-Low	\$0.01 - \$0.05

MAJOR SHAREHOLDERS

Eric Sprott	~ 10.0%
Management, Directors & Insider Ownership	~ 10.0%

EXPLORATION PRIORITIES

Jungo - Nevada

Drill to expand on the historical near surface Au-Cu mineralization

Amanita - Alaska

Drill beside Fort Knox Mine to define a near surface high-grade oxide gold resource

Amanita NE - Alaska

Farm out to 3rd party placer miners - create royalty to fund exploration

Golden Zone - Alaska

Follow up drill program along strike and at depth at the MEZ area – building more ounces to the Breccia Pipe's 300 K oz Au and 1.5 M oz Ag Ind. & Inf. resource inventory

GOLDEN ZONE, ALASKA

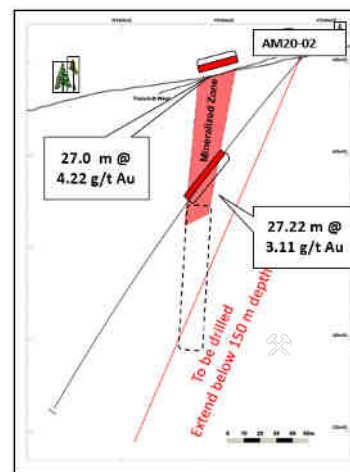

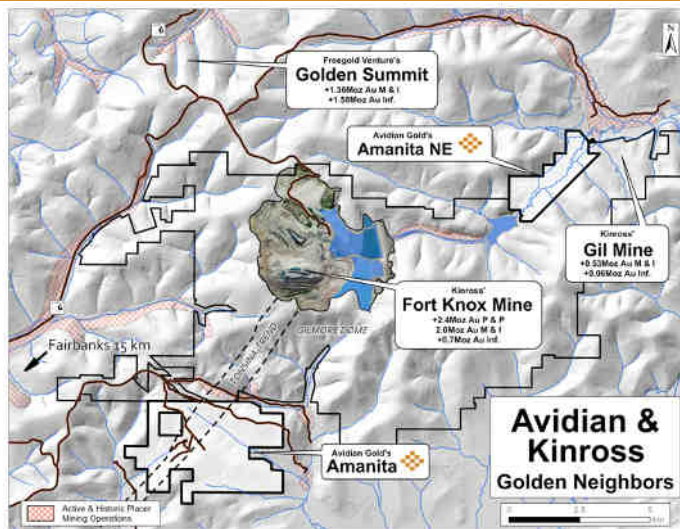

Breccia Pipe Deposit

0.5 g/t Au Cut-off (as of Nov 2016)

Category	Deposit Type	Tonnes	Au		Ag	
			Grade (g/t)	Ozs	Grade (g/t)	Ozs
Indicated	Porphyry	1,811,000	0.89	52,200	3.2	186,300
	Silica Breccia	369,000	0.93	11,100	8.64	102,500
	Sulphide	2,007,000	3.17	204,300	17.19	1,109,000
	TOTAL	4,187,000	1.99	267,400	10.38	1,397,800
Inferred	Porphyry	142,000	0.75	3,400	1.84	8,400
	Shear Zone	1,216,000	0.83	32,600	2.65	103,400
	TOTAL	1,353,000	0.83	35,900	2.56	111,400

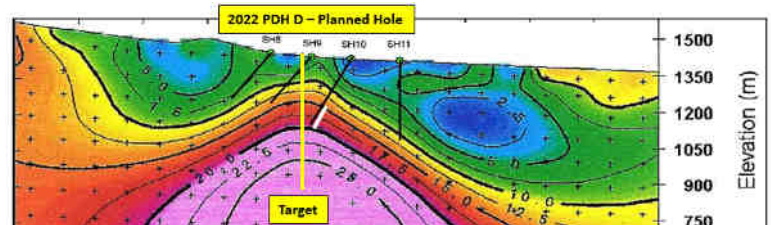

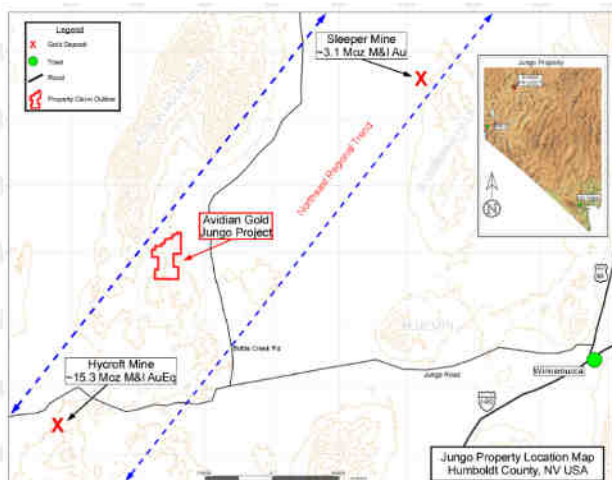

AMANITA PROPERTY, ALASKA

Amanita-focus is on near surface steep to moderate SE dipping structures and build a high grade gold resource

JUNGO, NEVADA

Chargeability Section: Old Hole SH10 stopped just short of anomaly, ended in altered intrusive with quartz veinlets and disseminated sulphides.

Assays showed increasing Au & As with increasing depth. The base of SH-10 (shown in white) had 59.4 m @ 0.11 g/t Au and 6,249 ppm As.
